

Luca Cirio

Full-stack developer with 2.5 years in enterprise software, building on 7 years of freelance technical work with **direct client and production ownership**.

Work spans **legacy enterprise systems** and modern web applications in **Angular, React and .NET**, with a growing focus on designing **AI systems** — agent orchestration, tool calling and structured, controllable LLM outputs.

EDUCATION & CERTIFICATES

- **Boolean Careers Course**
2024/01 – 2024/06
- **Mendix Rapid Developer**
2024/09 – 2024/10
- **Full Anthropic Academy**
2026/03 – 2026/05

LANGUAGES

- **Italian** — Native
- **English** — C1, fully working proficiency
- **Spanish** — A1

EU citizen · open to relocation

PROJECTS

- **Task Flow**
Full-stack task management platform with real-time workload anomaly detection. Clean Architecture, CQRS, RBAC and background workers; fully containerized with automated CI/CD and end-to-end test coverage.
github.com/Lucaalex00/taskflow
- **File Analyzer**
Document analysis service that combines rule-based pre-checks with LLM reasoning to assess untrusted files. Multi-format extraction, structured outputs and validation designed for controllable, auditable results.
github.com/Lucaalex00/file_analyzer

EXPERIENCES

- **Full Stack Developer** — **Leviahub**
2025 – Present · Canelli, Italy
Enterprise logistics software (TMS/WMS) serving 400+ clients across 6+ countries.
 - Designing a modular full-stack platform built around LLM orchestration: Next.js and .NET deployed in a clustered architecture, with MariaDB, Docker and GitLab CI/CD pipelines.
 - Lead developer on two enterprise web portals — internal administration and client-facing TMS/WMS operations — deployed on IIS.
 - Maintaining and evolving GESPE, the legacy framework the platform runs on.
 - Technical mentoring and onboarding of other developers.
- **Software Developer** — **ALTEN Italia**
2024/05 – 2024/11 · Genoa, Italy
Software development on client projects in a consulting environment like 'SIEMENS', working within established team processes and delivery standards.
- **Mechanical Technician** — **Freelance**
2017 – 2024 · Italy
Managed client relationships end to end, from design to finished product, with full responsibility for on-site interventions and production decisions. Transitioned to software development in 2024 while completing final client commitments.

SKILLS

- **Front-End** · Angular · React / Next.js · TypeScript
- **Back-End** · .NET C# · ASP.NET Core · REST APIs · Python
Data SQL Server · MariaDB · PostgreSQL
- **DevOps** · Docker · GitLab CI/CD · GitHub Actions
- **AI** · LLM orchestration · Agent design · Tool calling · Structured output · Azure OpenAI
